

**WYOMING
STATE PROTOCOL AGREEMENT
FY98 ANNUAL REPORT**

FIELD OFFICE: _____

Pursuant to Section II of the State Protocol Agreement, the BLM will prepare an annual summary report to the SHPO that describes the implemented actions taken in the previous fiscal year. This report will be due to the SHPO by February 15th of each year. Each Field Office operating under this Protocol shall, therefore, be required to provide the following information to the BLM Deputy Preservation Officer no later than **November 30th** of the reporting year:

1. Total number of all projects within a Field Office's management area requiring consideration of cultural resources (i.e., the total number of undertakings - this figure should be equal to the total of Items 9 and 10).

2. Total number of acres involving the projects from Item 1.

3. The subcategories below relate to projects (i.e., undertakings) conducted in each Field Office's management area for which no Class III inventory was conducted due to the project area having disturbed surface, having been previously inventoried, or because of low probability to affect historic properties.

- a. Total number of projects for which no Class III inventory was conducted due to disturbed surface; list each project's name and **estimated** number of acres involved in the project.

- b. Total number of projects for which no Class III inventory was conducted due to previous inventory; list each project's name and **estimated** number of acres involved in the project.

- c. Total number of projects for which no Class III inventory was conducted due to low probability to affect historic resources; list each project's name and **estimated** number of acres involved in the project.

- d. Total of all estimated acres from a, b, and c above.

4. The subcategories below relate to properties (cultural resources) identified within each Field Office's management area during the reporting period (i.e., total number of sites affected by or inventoried because of an undertaking during the fiscal year which is being reported).

- a. Number of newly recorded sites.

- b. Number of previously recorded sites.

5. The subcategories below relate to unevaluated properties, eligible properties, and ineligible properties encountered during the reporting period within each Field Office's management area. This includes both previously recorded resources and newly recorded resources (the total of a, b, and c below should be equal to the total of Item 4).

a. Number of unevaluated properties.

b. Number of eligible properties.

c. Number of ineligible properties.

6. Total number of projects (i.e., undertakings) for which no resources were identified within the Field Office's management area [i.e., No finds® or no resources found].

7. Total number of projects (i.e., undertakings) for which resources [includes historic properties and ineligible or unevaluated properties] were identified within the Field Office's management area (the total of Item 6 plus the total of Item 7 should equal Item 1).

8. The subcategories below relate to projects (i.e., undertakings) for which a finding of effect on historic properties was reached within the Field Office's management area. Do not confuse this with No finds® or ineligible properties. Determinations of effect only relate to historic properties. (Total of a, b, & c below should be equal to Item 5b.)

a. Number of projects with No effect.®

b. Number of projects with No adverse effect.®

c. Number of projects with Adverse effect.® List the name of the projects with adverse effect determinations.

9. Total number of projects (i.e., undertakings) to which treatment measures were applied to reduce effects. As per Section VI.B.6 of the Protocol, avoidance, project redesign, erection of barriers, or fencing of construction to avoid effects are **not** treatment measures. List the name of the projects to which treatment was applied and briefly describe the treatment measure (e.g., data recovery, stabilization, site burial, etc.).

10. Total number of projects (i.e., undertakings) for which an objection was issued or a dispute arose with the SHPO. List the project and the nature of the dispute (e.g., adequacy of inventory, eligibility, determination of effect, treatment, etc.).

--

11. Total number of projects (i.e., undertakings) for which a response was requested or required from SHPO but for which the SHPO did not respond. A response to a notification is not expected nor required.

--

12. Comments, findings, observations, or recommendations relevant to the implementation of the State Protocol Agreement. Please provide any constructive comments, particularly on problems you may have encountered in tracking and reporting the data requested in the annual report summation (Use additional paper as needed)
